Hardwood Flooring Cost

Room Dimensions Feet	Length (rounded up to a foot)	x	Width (rounded up to a foot)	Total (length times width = total sq.ft)
Room One	<input type="text"/>		<input type="text"/>	<input type="text"/>
Room Two	<input type="text"/>		<input type="text"/>	<input type="text"/>
Room Three	<input type="text"/>		<input type="text"/>	<input type="text"/>
Total before cut out and waste				<input type="text"/>
Cut out and waste add				<input type="text"/>
or				
			Square Feet Needed	<input type="text"/>
			Cost per sq.ft for Hardwoods	<input type="text"/>
				Total \$ for hardwood flooring
Final Total (to be ordered)				<input type="text"/>

5%
10%

* Industry standards calls for an additional 5% above the overall total sq/ft. However, depending on your selection of hardwood and the ability to cut out certain boards, consider adding 10%. If you are left with extra flooring, think of it as an insurance policy if you ever need to replace damage in the future. For 5% take the total sq/ft times 1.05 and for 10% take the total times 1.10. Remember, flooring is sold in boxes and you will round up or down to a full box.

Additional Costs

	Cost \$ per sq/ft	x	Total sq/ft (without cutout and waste)	Total	Or	Fix Cost Total
Furniture Removal and Replacement	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Carpet Removal	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Existing Hardwood or other Floor Covering Material Removal	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Subfloor Repair/ Replacement	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Hardwood Flooring Installation Cost	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Quarter Round Installation Cost*	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>
Quarter Round Material Cost*	<input type="text"/>		<input type="text"/>	<input type="text"/>		<input type="text"/>

	Total Project Cost \$ ²	÷	Total Sq/ft (before cut out and waste)	=	Total Cost Per Sq/ft in \$ ³
Total Project Cost	<input type="text"/>		<input type="text"/>		<input type="text"/>

* Quarter Round installation and material cost is based on linear feet. Simply measure each wall of the room add the totals together to get total linear feet (l/f)
¹ Some installers will quote a fixed cost not a cost per sq.ft on certain parts of a job.
² Add total hardwood flooring cost AND additional cost to equal total project cost.
³ Simply gives you the total sq/ft cost for the entire job including not only the hardwood flooring, but other associated cost.
